Antioxidant SG-R 603

Chemical Name: Hight temperature condensation products of diphenylamine and acetone

CAS NO.: N.A.

Product appearance : Dark brown viscous liquid

Applications:

This product is a general rubber antioxidant, which has effective protection from hot, oxygen and flex fatigue aging, also protect from the weathering and the ozone aging, and has certain aging protection for polyethylene and polypropylene. It is suitable for natural rubber and many kinds of synthetic rubbers. It is used in making tire, inner tire, rubber hose, rubber belt and the other industry rubber products, and also may serve as the stabilizer for synthetic rubber. In order to process easily it can added onto silica to make BLE-W and added into calcium carbonate to make BLE-C.

Packing: Packed with PE bag or cardboard drum, also can be packed according to customer's requirement.

Storage: Seal and store it in a cool, dry and ventilated place, keep moisture-proof and waterproof, far away from kindling material and heat source.
